HOW TO USE THE WORKSHOP

Cameras on please – this is not a lecture; this is an interactive workshop. The content has been written to move on when you participate.

Questions will be asked throughout the session, **please get involved** on the microphone and the chat. This is not the facilitator's session, **it's everyone's session!** Put your hand up or make a request to share on the mic using the chat.

Ask questions, share experiences, disagree, seek clarification, tell me to slow down - whatever you need at any time.

There will be opportunities to participate so... **we need to hear from you!**

THIS SESSION IS:

A heart-led reset.

A guided invitation to:

- Unplug from digital overload
- Reclaim time as a sacred resource
- Discover rest not as indulgence, but as intelligence
- Restore your nervous system's natural rhythm

ARE WE THE "ALWAYS-ON" GENERATION?

- Wired in, logged on, hyperconnected
- But increasingly disconnected from ourselves
- We check our phones more than we check in with our hearts
- And it's making us sick, scattered, and mentally malnourished

WHAT IS THE COST OF CONNECTION?

THE HIDDEN PRICE WE PAY

- Average screen time: 7+ hours daily
- Phone checks: 96 times per day
- Attention spans: Decreased by 25% in the last decade
- Sleep disruption: 71% report screens affect their rest
- Anxiety levels: Rising correlations with digital consumption

“What’s the hidden price you think we’re paying?”.

DIGITAL MIRROR AUDIT

WHEN LAST HAVE YOU GONE AN HOUR WITHOUT CHECKING A DEVICE?

Take 90 seconds to reflect and journal:

- How many hours did you give to your screen today?
- What did you miss while looking down?
- When did you last go an hour without checking a device?
- What emotions arise when you imagine being offline for a day?

THE MODERN EPIDEMIC:

DIGITAL DETOX & INFORMATION OVERWHELM

- 1 NEWS CYCLES
- 2 INFORMATION OVERLOAD
- 3 CONSTANT NOTIFICATIONS
- 4 SOCIAL COMPARISON

- A DEPLETED SELF WORTH
- B “MEAN WORLD SYNDROME”
- C FRAGMENTED ATTENTION
- D DECISION FATIGUE

WHAT HAPPENS WHEN WE PAUSE?

The Neuroscience of Stillness:

- **Default Mode Network activates:** Brain's "screensaver" promotes creativity
- **Parasympathetic response:** Rest-and-digest system engages
- **Neuroplasticity increases:** Brain becomes more adaptable
- **Stress hormones decrease:** Cortisol levels normalise
- **Memory consolidation:** Information processes into long-term storage

RECONNECTION PRACTICE

With Ruth Hoey
from
Re-Nurture

HOW MANY OF YOU...

...FELT MORE CONNECTED TO YOUR BODY THAN YOUR THOUGHTS?

...REALISED YOU'D BE HOLDING TENSION YOU DIDN'T KNOW WAS THERE?

...NOTICED NO DIFFERENCE, EVEN IF A SMALL ONE AFTER THAT SESSION?

HOW CAN WE REDEFINE REST?

REST AS INTELLIGENCE

Rest is *not*:

- Laziness or weakness
- Time wasted
- Something to feel guilty about
- Only for when you're "done"

Rest is:

- Strategic recovery
- Creative incubation
- Nervous system regulation
- Soul maintenance
- Revolutionary self-care

WHAT CHANGES ARE YOU GOING TO MAKE TODAY?

So here's the invitation:

What one thing will you change today to reclaim your rhythm?
It could be tiny: 5 minutes screen-free. A walk without your phone. Saying no to one extra thing."
